

Boil Water Notice Lifted
Longhorn Meadows PWS #0610217
Public Notice - 11-08-2025

We are pleased to inform you that the boil water notice has been officially lifted. All required water quality samples have been collected and analyzed, with results confirming no presence of total coliform bacteria. The water supply has been confirmed to be safe for human consumption.

We sincerely appreciate your patience, understanding, and cooperation throughout the recent booster pump failure, which led to a temporary reduction in water pressure.
